New Zealand is located near the centre of the water hemisphere and is made up of two main islands and a number of smaller islands. The two main islands (the North Island, or Te Ika-a-Māui, and the South Island, or Te Waipounamu) are separated by the Cook Strait, 22 kilometres (14 mi) wide at its narrowest point. Besides the North and South Islands, the five largest inhabited islands are Stewart Island, the Chatham Islands, Great Barrier Island (in the Hauraki Gulf), d'Urville Island (in the Marlborough Sounds) and Waiheke Island (about 22 km (14 mi) from central Auckland). The country's islands lie between latitudes 29° and 53°S, and longitudes 165° and 179°E.

**- MILFORD SOUND**  
New Zealand is one of only three countries in the world that contain fiords, the other two being Norway and Chile. Named the eighth wonder of the world and top ranked in international travel surveys, Milford Sound is perhaps our most famous fiord and cannot be missed.

**- LAKE WAKATIPU**  
A beautiful inland lake bordering on Otago.

**- AJ HACKETT BUNGY BRIDGE**  
Bungy Jumping is just one of the many exciting tourist activities Queenstown has to offer.
